54 **Process for the introduction of expressible genes into plant-cell genomes and agrobacterium strains carrying hybrid ti plasmid vectors useful for this process.**

57 A recombinant plant DNA genome is described which is free of oncogenic internal T-DNA regions of the wild-type Ti plasmid which contains an integrated gene of interest (5) foreign to said plant DNA which is obtainable by infecting a plant cell with an Agrobacterium harboring a hybrid Ti plasmid vector. Furthermore, a plant cell containing such a recombinant DNA genome and plants consisting at least partially of these plant cells are described.

EP 0 290 799 A3

DOCUMENTS CONSIDERED TO BE RELEVANT			
Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl.4)
